12.0 AMA PRA Category 1 Credit(s)TM

The 16th

Clinical Nuclear Medicine 2018

About This Meeting

This course is designed to provide a practical yet in-depth review of nuclear medicine with concentration on the latest trends, protocols and advances in clinical diagnosis and patient management. Faculty discuss techniques, tips and pitfalls through didactic lectures and case based presentations.

Target Audience

This course should benefit nuclear medicine physicians, radiologists, and nuclear medicine technologists. It should also benefit physicians who supervise and interpret nuclear medicine procedures. The course should also prove valuable for physicians who order these studies.

Scientific Sponsor

Educational Symposia

Accreditation

Physicians: Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this live activity for a maximum of 12.0 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Technologists: This program has been submitted to the ASRT. The number of A CE credits will be available approximately 30 days prior to the meeting. Please visit www.edusymp.com or call 1-800-338-5901 regarding the availability of Category A CE credit.

Educational Objectives

Attendees should, at the completion of this course, be able to:

- Apply state-of-the-art protocols to assess a hepatobiliary and gastrointestinal disorders.
- Discuss current and future directions of nuclear medicine.
- Describe the role of nuclear medicine when used to evaluate thyroid disorders.
- Explain the expanding role of nuclear medicine studies in the detection and management of pulmonary, bone and neurodegenerative disorders.

No special educational preparation is required for this CME activity.

The 15th **PET/CT Imaging 2018**

About This Meeting

This symposium is structured to provide a clinical perspective of PET and PET/CT imaging. Basic to advanced applications of PET and PET/CT are put in the context of disease detection and treatment planning. All faculty have been chosen for their teaching ability, as well as for their clinical expertise.

Target Audience

This CME activity should benefit radiologists, oncologists, nuclear medicine physicians, and nuclear medicine technologists. The course should also prove valuable for physicians who order these studies.

Educational Objectives

Attendees should, at the completion of this course, be able to:

- Apply state-of-the-art protocols to evaluate neurodegenerative disease and head and neck cancers to clinical practice.
- Optimize PET and PET-CT imaging protocols for the detection and follow up lung and breast cancer.
- Describe the advantages and pitfalls of PET and PET/CT.
- Differentiate normal variants and urgent findings on PET/CT.
- Discuss the utility of PET/CT when used to evaluate cardiac disease and gastrointestinal, thyroid and prostate cancers.

No special educational preparation is required for this CME activity.
