## About The Meeting

The purpose of this CME program is to review fundamentals of head & neck and brain imaging, as well as some topics of increasing importance in clinical practice. Lectures will focus on the spaces of the head & neck, temporal bone, sinuses, skull base, and larynx, in addition to topics in general neuroradiology. Each lecture will highlight imaging techniques, normal anatomy and common pathology with an emphasis on how the imaging findings directly affect patient management. Case-based lectures are designed to be interactive with audience participation encouraged. Both adult and pediatric pathology will be covered.

## Target Audience

This meeting is designed for general radiologists who wish to gain a better understanding of head & neck imaging and neuroradiology, as well as neuroradiologists desiring a comprehensive review of clinically important head & neck topics. Otolaryngologists, neurologists, neurosurgeons, radiation oncologists and other physicians who care for patients with head & neck and neurologic disorders should also find this program beneficial.

## Scientific Sponsor

Educational Symposia

## Accreditation

**Physicians:** Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this live activity for a maximum of 12.0 *AMA PRA Category 1 Credit(s)*<sup>™</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

## Educational Objectives

Attendees should, at the completion of this course, be able to:

- Identify normal anatomical features and common anomalies of the head & neck.
- Recognize imaging characteristics of common pathology in the head & neck and brain.
- Describe the specific role of the radiologist in the diagnosis and management of pathology in the head & neck and brain.
- Integrate state of the art imaging protocols to effectively evaluate head & neck and brain pathology in clinical practice.
- Differentiate infection from other pathology of the central nervous system.
- Review current stroke imaging protocols and discuss evolving techniques utilized prior to treatment.

*No special educational preparation is required for this CME activity.*

## Course Organization

This program is planned and organized by Educational Symposia, the leader in continuing medical education since 1975.

## Acknowledgement

Educational Symposia has received no corporate support for this symposium.
