20.0 AMA PRA Category 1 Credit(s)TM

**Optional BOLD Functional MRI
Hands-On Workshop**

October 14, 2018

7.25 AMA PRA Category 1 Credit(s)TM

Workshop attendance is limited to the first 25 Registrants

Please plan to attend the American Society of Functional Neuroradiology (ASFNR) 12th Annual Meeting to be held October 15-17, 2018 at the Hotel del Coronado in San Diego, California. An optional “hands-on” BOLD fMRI workshop will be conducted on October 14.

The ASFNR Annual Meeting will provide attendees with an unparalleled opportunity to receive instruction in the rapidly evolving field of functional neuroimaging and related disciplines. The program will appeal to a multidisciplinary group of professionals interested in neuroimaging including: neuroradiologists, neurologists, neurosurgeons, medical physicists, biomedical engineers, neuropsychologists, cognitive neuroscientists, clinical and research fellows, residents, doctoral and postdoctoral students, and radiology technologists.

During the 2 ½ day meeting, educational opportunities will include lectures, panel discussions, oral research paper presentations, posters, and small group study sessions. Instruction will be provided by an outstanding group of internationally recognized experts in the field.

I'm pleased to announce that this year's honorary lecturer will be Kamil Ugurbil, PhD from the Center for Magnetic Resonance Research at the University of Minnesota. Dr. Ugurbil, known for his groundbreaking work in BOLD fMRI and ultrahigh field MR imaging, will be sharing insights and perspectives gained through his integral involvement with the Human Connectome Project and the NIH BRAIN initiative.

Additional highlights of this year's program include:

- Updates on clinical BOLD fMRI for pre-surgical mapping including advanced anatomic considerations, multiband data acquisition, cerebral vascular reactivity imaging, and ultrahigh field fMRI.
- Advances in diffusion imaging including clinical application of diffusion tensor imaging and other diffusion based microstructural imaging techniques.
- New perspectives on cerebral perfusion imaging, radiogenomics, and other advanced methods of brain tumor analysis.
- An exploration of neuropsychiatric imaging.
- Best recommendations for pediatric functional neuroimaging methods.
- A look into the quickly evolving role of artificial intelligence in advanced neuroimaging.

This year, the popular pre-meeting ASFNR “Hands-On” BOLD fMRI data processing workshop, chaired by Dr. Scott Faro and Dr. Feroze Mohamed, will be expanded to include processing of resting state functional connectivity data. Registration is limited and demand is always high, so be sure to register early for this unique training opportunity.

The setting for this year's meeting is the beautiful Hotel del Coronado, an iconic beach resort across the bay from the city of San Diego. A short 20-minute drive or taxi ride from the San Diego International Airport, the facility offers a tranquil seaside setting with several dining opportunities and a beautiful beach. San Diego itself is one of the premiere tourist destinations in the United States and is famous for its wonderful weather throughout the year. The city provides a virtually endless palate of activities to satisfy all tastes. Whether your preferred leisure is outdoor adventure, athletics, fine dining, shopping, family theme parks, or simply enjoying a relaxing sunset stroll down the beach, San Diego has it all.

I look forward to seeing you at the Hotel del Coronado in October.
