Radiopharmaceutical Therapy in Benign and Malignant Diseases: Radiotheragnostic Practicum

September 25 – 26, 2020

The Wynn Las Vegas • Las Vegas, Nevada

12.25 AMA PRA Category 1 Credit(s)TM

ESI Educational
Symposia

ABOUT THE MEETING

The purpose of this CME course is to deliver to the audience the best practices in the growing field of radiotheragnostics (aka theranostics or theragnostics) for benign and malignant diseases, beginning with the fundamentals and extending to include their advanced clinical applications. The symposium has gathered an outstanding faculty with a vast practical and scientific experience in their designated topics. The overarching goal of each faculty is to arm the audience with the most comprehensive, relevant, and up-to-date knowledge, enabling them to optimally manage common as well as some unusual therapeutic challenges in their own practices. The symposium is intentionally structured to allocate each topic the attention and time that reflects the relative complexity and anticipated need in the nuclear medicine therapy practice. It includes some of the historically established therapies but optimally modernized as well as the recently introduced state-of-the-art modalities into the United States health care. The expert faculty will discuss the optimization of the radiotheragnostic practices for best utilization of various radiopharmaceuticals in contemporary health care delivery systems, both academic and private practice settings.

TARGET AUDIENCE

This meeting is designed for nuclear medicine physicians, nuclear radiologists, oncologists, nuclear medicine technologists, health physicists, and radiopharmacists.

ACCREDITATION

Physicians: Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this live activity for a maximum of 12.25 *AMA PRA Category 1 Credit(s)*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Technologists: This program has been submitted to the ASRT. The number of A CE credits will be available approximately 30 days prior to the meeting. Please visit www.edusymp.com or call (813) 806-1000 regarding the availability of Category A CE credit.

EDUCATIONAL OBJECTIVES

Attendees should, at the completion of this course, be able to:

- The difference between the radiotheragnostic approach and various other concepts guiding the therapeutic delivery of radiation to the target tissues with the objective of improving health outcomes.
- The best therapeutic practice approaches to hyperthyroidism and other benign thyroid diseases, based on evidence and/or sound medical judgment.
- The best therapeutic practice approaches to differentiated thyroid carcinoma, based on evidence and/or sound medical judgment.
- The optimal applications of Y-90 Ibritumomab Tiuxetan for therapy of lymphoma.
- The optimal applications of I-131 Iobenguane to diagnostic imaging and therapy of Pheochromocytoma and Paraganglioma.
- The optimal applications of Y-90 Resin and Glass Microspheres to radioembolization therapy of liver cancers.
- The optimal applications of Ga-68 Dotatate Imaging and Lu-177 Dotatate therapy of neuroendocrine tumors.
- The optimal approach to diagnostic imaging of recurrent and metastatic prostate cancer.
- The best approach to therapy of skeletal metastatic disease using various Bone-Seeking radiopharmaceuticals.
- The practical examples for evaluation of not listed cancers for radiotheragnostics-based trials.
- Best approaches to building radiotheragnostic practice in academic institutions.
- Best approaches to building radiotheragnostic practice in private practice settings.

No special educational preparation is required for this CME activity.
