COURSE ORGANIZATION
This program is planned and organized by Educational Symposia, a leader in continuing medical education since 1975.

ACKNOWLEDGEMENT
Educational Symposia appreciates our corporate sponsors and exhibitors. A list of industry sponsors will be provided and acknowledged at the meeting.

REGISTRATION INFORMATION
Directions for this conference: Include all course materials, including a comprehensive course syllabus (printed black and white, and color syllabus), daily continental breakfast and coffee breaks. Early registration is strongly suggested. There will be a $50 surcharge for anyone registering after April 6, 2015. Minimum and maximum attendance levels have been established for this activity. If you cannot register early, you will be unable to receive a full tuition refund.

Directions for this meeting: Includes participation for one registration. Each registration must sign up on a separate computer terminal in order to successfully complete the meeting. If you will need any questions or problems with logging into the meeting, we will have support personnel available at (800) 598-7901. There will be a $50 surcharge for anyone registering after April 6, 2015.

Please note: A MINIMUM NUMBER OF REGISTRANTS IS REQUIRED TO LIVE WEBCAST THIS COURSE. The minimum number is not met by March 20, 2015. The live webcast activity may be cancelled and a full refund issued.

EDUCATIONAL OBJECTIVES
Educational Symposia has been approved by the American Board of Pathology as a provider of SAMs.

Educational Symposia designates this live activity for a maximum of 16.25 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Physicians: Educational Symposia designates this live activity for a maximum of 16.25 AMA PRA Category 1 Credit(s)™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Target Audience: This CME activity is primarily designed to educate practicing pathologists.

Target Audience: This CME activity is primarily designed to educate practicing pathologists.

Scientific Sponsor: Educational Symposia

About the Meeting:
This seminar is designed to provide a practical review of gastrointestinal, genitourinary, liver disease, and immunologic disease with emphasis on diagnostic methodologies. It will also examine the role of ancillary techniques in the pathologic diagnosis as well as an approach to ancillary diagnostic techniques.

Scientific Sponsor: Educational Symposia

Accreditation Information:
This CME activity is primarily designed to educate practicing pathologists.

Educational Symposia has been approved by the American Board of Pathology to provide continuing medical education for physicians.

This activity is designated for SAMs. 

For more information on educational preparation for this CME activity, please visit the “Making the Most” section at the end of this activity.

MAKE THE MOST OF YOUR EDUCATIONAL TIME: 
Redfer your calendar and just add email announcements. Please visit the “Making the Most” section below.

Making the Most of Your Educational Time:
Educational Symposia has planned and organized this educational activity for you, the practicing pathologist. Providers of this activity have been committed to quality of care at the highest standards and commitment to education.

Special Note for the Disabled:
Educational Symposia ensures that no one is excluded, denied benefits, or otherwise subjected to discrimination on the basis of disability and that all activities are accessible to persons with disabilities. Please contact us at (800) 338-5901 or (813) 806-1000 for more information.

A PRACTICAL APPROACH TO SURGICAL PATHOLOGY

ABOUT THE MEETING
This seminar is designed to provide a practical review of gastrointestinal, gynecologic, genitourinary and hepatobiliary soft tissue pathology, as well as diagnostic immunohistochemistry. Faculty will discuss pitfalls and pearls to pathologic diagnosis as well as an approach to ancillary diagnostic techniques. There will be significant time for interactive discussion between participants and faculty members.

TARGET AUDIENCE
This seminar is designed to enhance processing pathologists.

SCIENTIFIC SPONSOR
Educational Symposium

ACCREDITATION
Educational Symposium is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposium designates this live activity for a maximum of 16.25 AMA PRA Category 1 Credits™. Physicians should claim the activity commensurate with the extent of their participation and learning.

Educational Symposium has been approved by the American Board of Pathology as a provider of CME.

This activity is designated for SAM Credits.

EDUCATIONAL OBJECTIVES
Educational Symposium recognizes the completion of this course allows:
• Develop a practical approach to common morphologic problems in soft tissue tumors.
• Recognize the diagnostic techniques including, immunohistochemistry and molecular diagnosis in the approach to difficult soft tissue tumors.
• Describe the important diagnostic clues that are used as a specific diagnosis in the most common problems seen in soft tissue tumors.
• Explain the criteria for the primary line of histologic features to guide pathologists.
• Recognize the key histologic features in the diagnosis of focal nodular hyperplasia, hepatocellular adenoma and well-differentiated hepatocellular carcinoma.
• Describe the clinical, laboratory and histologic features necessary to properly evaluate malignant soft tissue, including Wilms’ tumor, alveolar rhabdomyosarcoma and bone sarcomas.
• Describe the clinicopathologic features of other tumors and the molecular pathology.
• Describe the role of molecular pathology in gastrointestinal, gynecologic and genitourinary tumors.
• Recognize the different metastatic sources.
• Recognize common morphologic pitfalls in the common malignant neoplasms of the uterus.
• Diagnose adenomyosis and type I adenomyosis.
• Apply the histology criteria for identification of gynecologic neoplasms.
• Describe the biologic features of gastrointestinal stromal tumor.
• Differentiate malignant melanoma.
• Describe the differential diagnosis of metastatic melanoma.
• Describe the morphologic features of metastatic melanoma.
• Describe the morphologic features of cutaneous melanoma.
• Differentiate malignant melanoma from its metastases.

No special educational preparation is required for this CME activity.
EDUCATIONAL OBJECTIVES

This seminar is designed to provide a practical review of gastrointestinal, gynecologic, genitourinary, hepatobiliary and other soft tissue tumor issues. The goals of this activity include:

• Distinguish urothelial carcinoma in situ from reactive urothelial atypia.

• Describe the most common enrollment criteria for active surveillance in prostate cancer with emphasis on pathologic variables.

• Distinguish pT3 RCC from renal confined (pT1-2) RCC based on a better understanding of the definition of renal sinus involvement.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinoma.

• Describe the most important diagnostic clues in arriving at a specific diagnosis in the most common primary hepatobiliary tumors.

• Describe ancillary diagnostic techniques including immunohistochemistry and molecular diagnostics in the approach to difficult soft tissue tumors.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Define the clinical, laboratory, genetic and histologic features necessary to properly evaluate metabolic disease.

• Discuss the clinical, laboratory, genetic and histologic features necessary to properly evaluate metabolic disease.

• Discuss the clinical, laboratory, genetic and histologic features necessary to properly evaluate metabolic disease.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

• Recognize the different subtypes of endometrial cancers.

• Recognize carcinomas that are not currently unclassified endometrial cancers of the uterus.

• Develop an approach to common morphologic patterns seen in soft tissue tumors.

• Apply histopathologic criteria for recognition of gastrointestinal secondary tumors.

• Discuss the limitations of conventional diagnostic endoscopic and fine needle aspiration.

• Describe the transcription factors useful for the determination of primary site in metastatic carcinomas.

THURSDAY, APRIL 16, 2015

7:00 – 8:00 AM Registration and Continental Breakfast for Registrants.

8:00 – 8:10 Welcome and Introduction
John R. Goldblum, M.D.

9:00 – 10:00 AM Mesenchymal Tumors of the Gastrointestinal Tract: An Update
John R. Goldblum, M.D.

10:15 – 11:15 AM Metabolic Liver Diseases
John Hart, M.D.

11:15 – 12:15 PM A Practical Approach to Pure Mesenchymal Tumors of the Liver
Esther Oliva, M.D.

12:30 – 1:30 PM Lunch On Your Own

THURSDAY, APRIL 16, 2015 (CONTINUED)

1:30 – 2:30 PM Immunohistochemistry in Soft Tissue Pathology: Novel Diagnostic Markers
Jason L. Hornick, M.D.

2:30 – 3:30 PM Coffee Break for Registrants

3:30 – 4:30 PM The Pathology of Endometrial Carcinoma: Are There Simple But Frequently Challenging Diagnostic Challenges
Esther Oliva, M.D.

4:30 – 5:30 PM Metastatic Carcinomas of Unknown Primary: Diagnostic Approach Using Immunohistochemistry
Jason L. Hornick, M.D.

End of Session

FRIDAY, APRIL 17, 2015

7:30 – 8:00 AM Continental Breakfast for Registrants.

8:00 – 9:00 AM Renal Cell Carcinoma: New Entities and Problem Diagnosis
David J. Grignon, M.D., FRCP(C)

9:00 – 10:00 AM Soft Tissue Tumors II
John R. Goldblum, M.D.

10:15 – 11:15 AM Adrenal Gland: A Spectrum of Tumors
John R. Goldblum, M.D.

11:15 – 12:15 PM Gleason Grading of Prostate Cancer in 2005: Applications and Significance
David J. Grignon, M.D., FRCP(C)

12:15 – 1:00 PM Bladder Cancer: What is New and Clinically Important?
Esther Oliva, M.D.

1:00 – 2:00 PM End of Session

SATURDAY, APRIL 18, 2015

7:30 – 8:00 AM Continental Breakfast for Registrants.

8:00 – 9:00 AM The Spectrum and Clinical Relevance of Endometrial Stromal Tumors
John R. Goldblum, M.D.

9:00 – 10:00 AM Immunohistochemistry of Endometrial Stromal Tumors
Esther Oliva, M.D.

10:15 – 11:15 AM Endometrial Stromal Tumors
John R. Goldblum, M.D.

11:15 – 12:15 PM Bleeding, Menstruation, Amenorrhea: A Review
John Hart, M.D.

12:15 – 1:00 PM End of Course
THURSDAY, APRIL 16, 2015

7:00 – 8:00 AM Registration and Continental Breakfast for Registrants

8:00 – 8:10 Welcome and Introduction
John R. Goldblum, M.D.

8:10 – 9:10 Well-Differentiated Lipomatous Tumors – Common Problems with Common Tumors
Jaan L. Horsko, M.D.

9:10 – 10:10 Mesenchymal Tumors of the Gastrointestinal Tract: An Update on SIGT and Differential Diagnosis using Immunohistochemistry
Jaan L. Horsko, M.D.

10:10 – 10:30 Coffee Break for Registrants

10:30 – 11:30 Ross Not to Spear Up a Small Browl Boppe
J. K. Greenman, M.D.

11:30 – 12:30 PM Primary Liver Tumors
John Hart, M.D.

12:30 – 1:30 Lunch On Your Own

THURSDAY, APRIL 16, 2015 (CONTINUED)

1:30 – 2:30 Immunohistochemistry in Soft Tissue Pathology: Novel Diagnostic Markers
Jaan L. Horsko, M.D.

2:30 – 3:15 Esophagitis is a Pain in the Neck
J. K. Greenman, M.D.

3:15 – 3:30 Coffee Break for Registrants

3:30 – 4:30 The Pathology of Endometrial Carcinoma: An Often Simple But Frequently Challenging Differential Diagnosis
Esther Oliva, M.D.

4:30 – 5:30 Metabolic Liver Diseases
John Hart, M.D.

5:30 – 6:00 A Practical Approach to Pure Mesenchymal Tumors of the Liver
Oliver Castle, M.D.

6:00 – 7:00 End of Session

FRIDAY, APRIL 17, 2015

7:30 – 8:00 AM Continental Breakfast for Registrants

8:00 – 9:00 Renal Cell Carcinoma: New Entities and Problem Diagnoses
David J. Greenman, M.D., FRCP(C)

9:00 – 10:00 Collaps is a Pain in the Butt
J. K. Greenman, M.D.

10:00 – 10:15 Coffee Break for Registrants

10:15 – 11:15 Metastatic Carcinoma of Soft Tissue Tumors I
Esther Oliva, M.D.

11:15 – 12:15 PM Gleason Grading of Prostate Cancer in 2005: Applications and Significance
David J. Greenman, M.D., FRCP(C)

12:15 – 1:00 Bladder Cancer: What is New and Clinically Important?
Shahrazis and Shahnapourshah
John Hart, M.D.

1:00 – 1:30 Lunch On Your Own

1:30 – 2:30 Immunohistochemistry in Soft Tissue Pathology: Novel Diagnostic Markers
Jaan L. Horsko, M.D.

2:30 – 3:15 Esophagitis is a Pain in the Neck
J. K. Greenman, M.D.

3:15 – 3:30 Coffee Break for Registrants
