Inside Passage with Glacier Bay aboard the Ruby Princess

Roundtrip from Seattle, Washington

Tuition
\$895⁰⁰ per person

Early registration is strongly suggested.

Tuition includes a comprehensive downloadable electronic course syllabus.

Book By March 28, 2017

About The Meeting

The purpose of this CME program is to review the fundamentals of head and neck radiology, as well as some topics of increasing importance in clinical practice. Lectures will focus on the spaces of the head & neck, temporal bone, sinuses, skull base, and larynx, as well as special topics such as parathyroid imaging and H&N vascular lesions. Each lecture will highlight imaging techniques, normal anatomy and common pathology with an emphasis on how the imaging findings directly affect patient management. There will be several case-based lectures designed to be interactive with audience participation. Both adult and pediatric pathology will be covered.

Target Audience

This meeting is designed for general radiologists who wish to gain a better understanding of head and neck radiology, as well as neuroradiologists desiring a comprehensive review of clinically important H&N topics. Otolaryngologists, radiation oncologists and other physicians who care for patients with head and neck disorders should also find this program beneficial.

Scientific Sponsor

Educational Symposia

Accreditation

Physicians: Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this live activity for a maximum of 12.0 AMA PRA Category 1 Credit(s)TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Educational Objectives

Attendees should, at the completion of this course, be able to:

- Identify normal anatomical features and common anomalies of the head and neck.
- Recognize imaging characteristics of pathology in the head and neck.
- Appreciate the specific role of the radiologist in the diagnosis and management of pathology in the head and neck.
- Integrate state of the art imaging protocols to effectively evaluate head and neck pathology in clinical practice.

No special educational preparation is required for this CME activity.
