### About The Meeting

This course is designed to provide a practical yet detailed insight into the modern imaging diagnosis of head and neck cancer. Faculty will review the fundamentals of head and neck cancer imaging; including anatomy, and imaging characteristics of tumors of the skin, mucosal surfaces, sarcomas, HPV-associated phenomena, and perineural tumor spread. Pearls and pitfalls on how to best image various head and neck cancers, and avoiding misdiagnosis will be presented. Case presentation sessions will encourage audience participation.

### Target Audience

This CME activity is primarily intended and designed to educate general radiologists and neuroradiologists who wish to enhance their knowledge of imaging and treatment of head and neck cancer. This activity should also benefit ENT physicians, head and neck surgeons, medical and radiation oncologists, and general surgeons who are interested in head and neck cancer diagnosis.

### Scientific Sponsor

Educational Symposia

### Accreditation

**Physicians:** Educational Symposia is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

Educational Symposia designates this live activity for a maximum of 12.0 AMA PRA Category 1 Credit(s)<sup>TM</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

### Educational Objectives

Attendees should, at the completion of this course, be able to:

- Recognize the etiologic and risk factors in the development of Human Papilloma Virus-associated head and neck malignancy.
- Describe the role of the radiologist in treatment planning of head and neck cancer.
- Determine the optimal imaging techniques for imaging the head and neck utilizing CT, MRI, and PET/CT.
- Illustrate the imaging appearance of typical complications that may result from therapy for head and neck cancer.
- Appreciate the complexity of determining post-treatment efficacy in head and neck cancer by CT, MRI, and PET/CT.
- Recognize the clinical circumstances surrounding, and imaging appearance of cranial neuropathy and perineural tumor spread in the head and neck cancer patient.

*No special educational preparation is required for this CME activity.*
