Symposia

ABOUT THE MEETING

This seminar has been designed to provide a practical and comprehensive review of a number of practical topics in surgical pathology including gastrointestinal, pulmonary, gynecologic, hepatobiliary, genitourinary, and soft tissue pathology. This course will include an overview of diagnostic pearls which allow for accurate diagnosis as well as clues as to how to avoid the most common diagnostic pitfalls. A portion of the discussion will be related to appropriate diagnostic immunohistochemical and molecular genetics tests which allow the pathologist to refine their diagnosis. There will also be significant opportunity for interactive discussion between faculty members and participants.

TARGET AUDIENCE

This CME activity is primarily designed to educate practicing pathologists.
